EXECUTIVE CORE SUMMARY

Results-driven and highly autonomous Frontend Developer with a proven track record of engineering scalable web applications and high-performance SaaS ecosystems. Recognized for exceptional self-learning abilities and an analytical approach to complex technical problem-solving. Proficient in React.js and SASS blueprinting, with extensive hands-on experience integrating serverless cloud layers (Firebase) to stream real-time data components with zero-latency reflection. Passionate about clean code architecture, reusable UI design systems, and converting intricate operational workflows into responsive, interactive user experiences.

WORK EXPERIENCE

Frontend Developer / Freelancer

📅 JAN 2026 - PRESENT

🏢 SELF-EMPLOYED / PROJECT-BASED DEVELOPMENT

- Architected and deployed responsive, pixel-perfect web interfaces using React.js (Vite) and SASS blueprinting based on complex user and client specifications.
- Integrated Google Firebase Suite as a serverless backend layer, implementing real-time data management (onSnapshot), secure user authentication, and persistent dynamic states.
- Engineered robust dynamic forms using advanced state management, combining Framer Motion for smooth UI/UX animations and clean lifecycle hooks for optimized performance.
- Managed end-to-end source code pipelines efficiently using Git and GitHub workflows, facilitating continuous integration and smooth production deployment via Vercel.

 PROFESSIONAL TECHNICAL SKILLS

Frontend Architecture

React.js

SASS / SCSS Blueprinting

JavaScript (ES6+)

HTML5 & CSS3

Responsive Web Design

UI/UX Visual Engineering

Backend & Cloud Utilities

Firebase Firestore

EmailJS Integration

Web App Security Layering

Data Anonymity Arrays

Engineering Tools & Platforms

Vercel

Netlify

VS Code

Chrome DevTools

npm (Node Package Manager)

Git / GitHub

AI & Workflow Optimization

Cursor AI

Claude AI Assisted Coding

Algorithmic Problem Solving

 EDUCATION & CREDENTIALS

G.C.E. Advanced Level (A/L)

Teldeniya National School

📅 2020 - 2023

G.C.E. Ordinary Level (O/L)

Teldeniya National School

📅 2017 - 2019

Certifications (In Progress)

Google Professional Cybersecurity
(via Coursera)

Microsoft Certified: Azure
Fundamentals (AZ-900)

Expected 2026

FEATURED PROJECTS

Educa | Advance Learning Platform

A comprehensive educational resource hub providing students with organized, downloadable study materials and lesson notes through a minimalist and user-friendly React interface.

URL: <https://educa-lms-platform.vercel.app/>

Zestara | in process

Designed and developed a premium, conversion-optimized e-commerce storefront frontend utilizing advanced component blueprinting. Engineered custom relational client-side search engines and multi-tier fuzzy product filtering algorithms.

URL:

Dream Tracker

Architected an interactive academic tracker featuring gamified focus timers and real-time behavioral data structures. Programmed automated study schedulers and rendered high-density performance indices using Recharts.

URL: <https://future-plan-six.vercel.app>

info.lanka | Services

Built a fully responsive civic services index portal aggregating access metrics for over 200+ verified public sectors. Implemented a lightning-fast client-side keyword search engine running fuzzy matching loops over local JSON data.

URL: <https://info-lanka-project.vercel.app>

INTERESTS & LANGUAGES

- **UI/UX Visual Engineering**

Building futuristic, high-density digital layouts and interactive designs.

- **Strategic Chess**

Algorithmic problem solving, critical thinking, and pattern recognition.

- **Ethical Hacking & Web Security**

Exploring web application security, data anonymity, and compliance protections.

- **Languages**

Sinhala (Native)

English (Professional Working Proficiency)
